CYBER RESILIENCE · EXTERNAL ATTACK SURFACE

Maine

How exposed are the state's critical access hospitals from the outside?

88.9% of 9 assessed hospital domains sit in an elevated risk band (Critical or High)

National: 78.3% · mean score 79.0 vs 68.5 national (+10.5)

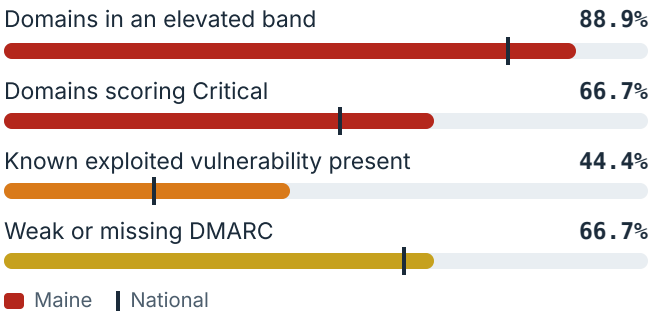

9	10	79.0	7th
hospital domains assessed in Maine	critical access hospitals located in the state	mean score · High band (0–100)	most exposed of 42 reported states, by share elevated

Small sample. Maine has 9 assessed domains. At this size one hospital moves each percentage by 11 points, so read these figures as indicative rather than as a ranking.

Maine against the national picture

Bars are Maine; the black tick is the national figure across 977 domains.

How the 9 domains are distributed

Each domain is scored on its worst internet-facing machine.

DOMAINS WITH A FINDING IN	ME	US	DIFF
Vulnerabilities	78%	53%	+25 pts
Email authentication	67%	77%	-11 pts
Exposed services	78%	66%	+12 pts
Web application and DNS	89%	88%	+1 pts

THREE FIXES THAT MOVE THE NEEDLE

01

Enforce email authentication

Publish DMARC, read its reports, then move to p=reject. A DNS change: no purchase, no downtime. 67% of Maine domains are weak or missing here.

02

Close admin and database doors

Remote Desktop, SSH and database ports should not answer the internet. Put them behind a VPN or turn them off.

03

Retire forgotten records

Remove DNS records that point at services you no longer run, and patch or replace outdated web libraries.

How this was measured. Passive observation of what each hospital publishes to the internet: DNS, certificates, open ports and public web pages. Nothing was logged into or exploited. Vulnerabilities are checked against the CISA Known Exploited Vulnerabilities catalog and FIRST EPSS, current to 2026-09-08; part of the scan data is older, so read the figures as a floor. Domain counts are not hospital counts: one health-system domain can carry several hospitals. No hospital is named; figures are aggregate only.

SureShield with BorderHawk.
Check any critical access hospital's band, or test your email security for free, on the SureShield critical access hospital site.
