CYBER RESILIENCE · EXTERNAL ATTACK SURFACE

Tennessee

How exposed are the state's critical access hospitals from the outside?

88.9% of 9 assessed hospital domains sit in an elevated risk band (Critical or High)

National: 78.3% · mean score 82.0 vs 68.5 national (+13.5)

9
hospital domains assessed in Tennessee

14
critical access hospitals located in the state

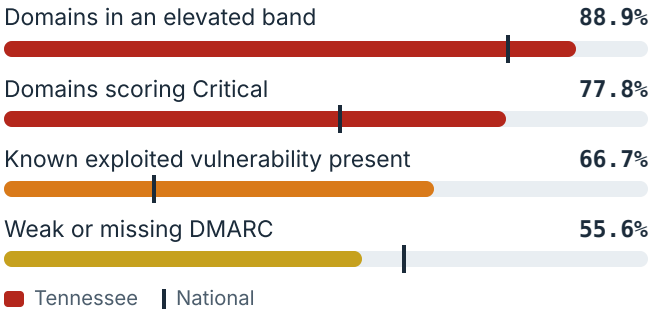

82.0
mean score · Critical band (0–100)

7th
most exposed of 42 reported states, by share elevated

Small sample. Tennessee has 9 assessed domains. At this size one hospital moves each percentage by 11 points, so read these figures as indicative rather than as a ranking.

Tennessee against the national picture

Bars are Tennessee; the black tick is the national figure across 977 domains.

How the 9 domains are distributed

Each domain is scored on its worst internet-facing machine.

DOMAINS WITH A FINDING IN	TN	US	DIFF
Vulnerabilities	67%	53%	+14 pts
Email authentication	56%	77%	-22 pts
Exposed services	56%	66%	-10 pts
Web application and DNS	89%	88%	+1 pts

THREE FIXES THAT MOVE THE NEEDLE

01
Enforce email authentication
Publish DMARC, read its reports, then move to p=reject. A DNS change: no purchase, no downtime. 56% of Tennessee domains are weak or missing here.

02
Close admin and database doors
Remote Desktop, SSH and database ports should not answer the internet. Put them behind a VPN or turn them off.

03
Retire forgotten records
Remove DNS records that point at services you no longer run, and patch or replace outdated web libraries.

How this was measured. Passive observation of what each hospital publishes to the internet: DNS, certificates, open ports and public web pages. Nothing was logged into or exploited. Vulnerabilities are checked against the CISA Known Exploited Vulnerabilities catalog and FIRST EPSS, current to 2026-09-08; part of the scan data is older, so read the figures as a floor. Domain counts are not hospital counts: one health-system domain can carry several hospitals. No hospital is named; figures are aggregate only.

SureShield with BorderHawk.
Check any critical access hospital's band, or test your email security for free, on the SureShield critical access hospital site.
